

COMP4537 – Final Term Project Information

Team U4

Dustin Brooks

Linh Truong

For this app, we decided to build upon the last individual assignment. The admins can login and create multiple quizzes with different questions associated to each quiz. Furthermore, the admins can create new students, modify the students' login credentials (username/password), or delete students. The admins can also update and delete individual quiz questions for any of the quizzes. The students will have to login and will only be able to login with an account that an admin has created for them.
